Gardening day

On Saturday I went to help my grandparents in their garden. They grow the usual vegetables and flowers, but also some interesting exotic ¹soil / plants with strange shapes and colours. First I had to cut the ²grass / tree, which had grown very long. Then I helped grandma to plant a rose ³bush / leaf. You have to be careful not to damage the ⁴fruit / roots when putting them in the ground. The most difficult thing was cutting a dry ⁵branch / trunk off an apple tree – I actually had to climb the tree and sit among the green ⁶roots / leaves, which kept getting into my eyes. It was a busy day!
